# ANDREW DE FOREST

714-768-1347 | Lakewood, CA | andydeforest@gmail.com | GitHub | andydeforest.dev

Skilled, resourceful, and collaborative full-stack developer with over a decade of experience building and maintaining performant web applications.

## CORE TECHNOLOGIES

- **Front-end:** JavaScript (ES6+), TypeScript, Vue, Nuxt, React, Mapbox, Pinia, SASS/SCSS
- **Back-end:** Node.js (Express, Fastify), PHP (Laravel, WordPress), RESTful & GraphQL API Development
- **Database & Storage:** PostgreSQL, MySQL, DynamoDB, AWS S3
- **Other:** Electron, DatoCMS, Contentful, Amazon Web Services (AWS), Microsoft Azure, WordPress, OpenAI Codex

## RECENT EXPERIENCE

**RESCUE AGENCY** 2026 - Present

**Manager, Web Development**

- Led and managed a team of developers, technical producers, and designers, overseeing technical execution, workload distribution, professional development, and delivery of client-facing projects
- Established and refined development standards, workflows, and quality assurance processes to improve code maintainability, team efficiency, and consistency across projects
- Collaborated with project management, creative, strategy, and senior management to translate business requirements into technical solutions, timelines, and resource estimates
- Utilized AI solutions to refactor legacy codebases to modern standards, create streamlined automation pipelines, and troubleshoot complex bugs

**WSP** 2025 - 2026

**Software Developer**

- Led migration of mission-critical legacy web applications to a modern Microsoft Azure environment with zero customer downtime
- Developed and maintained custom WordPress websites, implementing responsive front-end designs, custom themes, and client-specific functionality
- Investigated and resolved issues across existing PHP applications, improving application stability, functionality, and performance
- Collaborated with designers, project managers, and other developers to deliver web applications and updates within requirements and deadlines

**RESCUE AGENCY** 2022 - 2025

**Web Developer II, Technical Lead**

- Provided technical leadership and architectural direction across web applications
- Designed, developed, and optimized full-stack applications using Vue.js/Nuxt on the front-end, and Node.js/PHP on the back-end
- Demonstrated a deep understanding of application architecture, security best-practices, and database management to scope, plan, build, and maintain web applications
- Modernized, refactored, and upgraded legacy full-stack applications, improving performance and user experience while maintaining backend stability
- Selected for company-wide quarterly Team Player Award
